

In leading recording studios,
music that will soon be heard
everywhere is heard first through
Bowers & Wilkins speakers.

For people who love music

With music, as with so much else in life, details matter. A brush on a cymbal. The scrape of a plectrum on a guitar string. The atmosphere in the room at the moment the performance took place. It's details like these that make a recording come alive. Why does it matter? Because, for some of us, it's not enough just to hear music. We want to feel it.

Shingai Shoniwa

Singer-songwriter, bassist,
and lead vocalist for The Noisettes

Shared passion

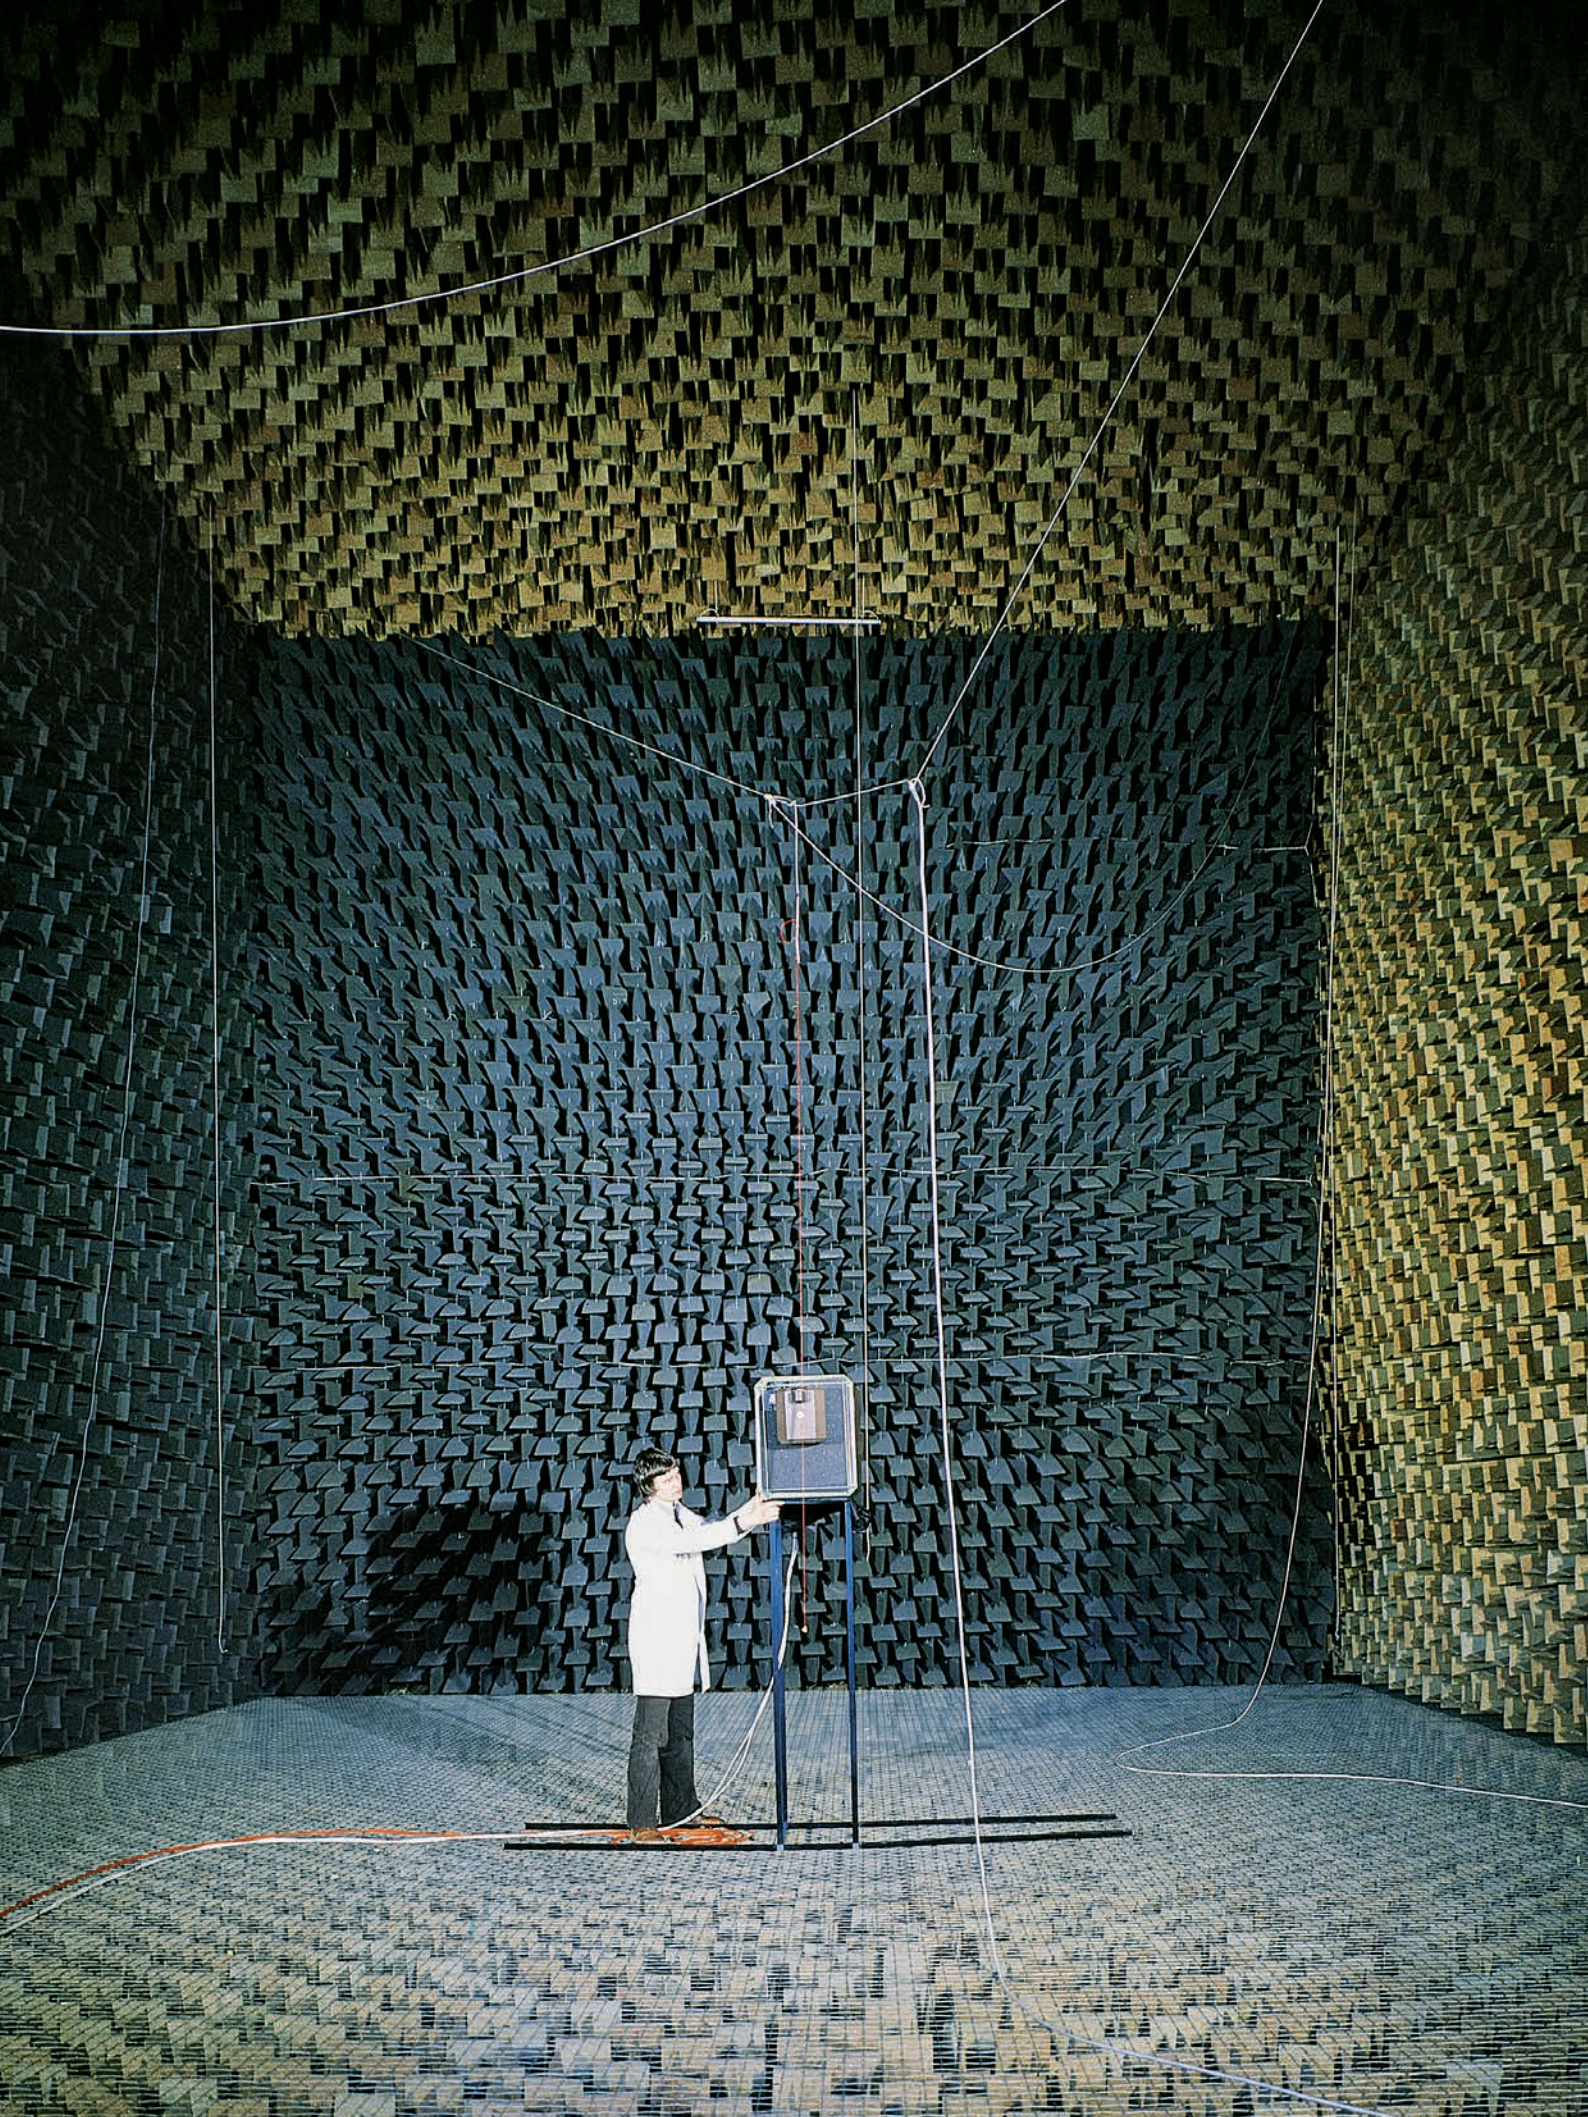

Music is important. You know it, we know it. And if you care about music as much as we do, you'll want to share that passion with others. We've created a place where some of the world's leading artists can share music in the way they intended it to be heard. A place where people who love music can come for ideas and inspiration. A society of sound.

Little Axe
Recording in Real World Studios

True sound

For 50 years, we've been dedicated to helping listeners get closer to the music they love. Our aim is neither to add nor take away from music. Instead, we want to simply reveal it. To bring you as close as possible to the authentic sound of the original performance. We call it true sound. And you can hear it in every product we make.

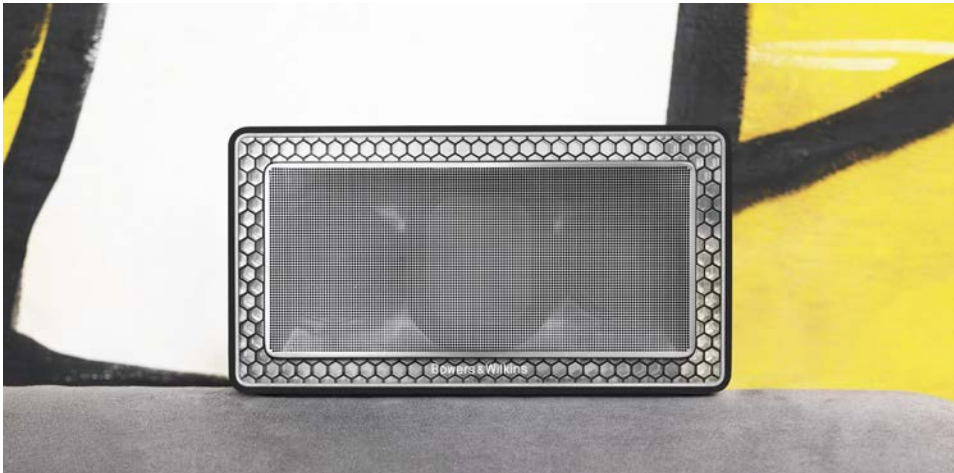

50 years of excellence

We've come a long way since 1966. Over half a century, we've pushed at the boundaries of acoustic engineering, won industry awards and played a role in the history of recorded music. But there are always more challenges to overcome. New developments in the pipeline. What does the future of speaker design hold? For now, as we celebrate our 50th year, let's just say there's a lot to look forward to.

Music systems

Our Hi-Fi speakers are the culmination of half a century of audio innovation. From our most advanced models to our entry-level series, these speakers set new standards for acoustic realism, revealing depth and detail in your music you never knew existed. It's the reason you'll find them in leading recording studios, as well as the homes of serious audio fans.

Nautilus
Sound and vision

What do you get when you give some of the world's most visionary audio engineers an open brief to create, as near as possible, the perfect loudspeaker? The answer is Nautilus™, a loudspeaker that defied convention and rewrote the rules of acoustic design. It's an icon that continues to shape our ideas to this day.

800 Series Diamond **True sound realised**

The choice of professional recording studios, and revered by serious Hi-Fi enthusiasts, the 800 Series Diamond is more than just our flagship reference speaker range. It's the pinnacle of Hi-Fi loudspeaker performance.

804 D3

805 D3

For more detailed information visit www.bowers-wilkins.com/800series

Diamond dome
The tweeter domes of the 800 D3 are formed of diamond, a super-material with ideal properties for delivering high frequency sound.

Solid body tweeter
The diamond tweeter dome is housed in an enclosure formed from a single piece of solid aluminium, to eliminate resonance at high frequencies.

Continuum cone
Eight years in the making, the Continuum cone is a significant step forward from Kevlar®, delivering unheard-of clarity in the midrange.

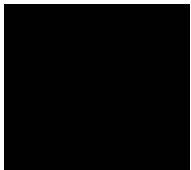

Turbine head
Built from solid aluminium and braced with internal fins, the Turbine head reduces internal resonance and aids sound dispersion.

Matrix
Our new metal-reinforced Matrix™ structure provides the ultimate in internal bracing, ensuring sound comes from the drivers, not the cabinet.

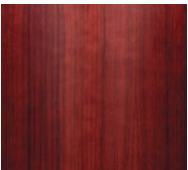

800 Series Diamond

Gloss Black

Satin White

Rosenut

800 D3
The speaker recording professionals trust to deliver true sound.

802 D3
Studio-quality sound, and a slightly smaller footprint.

805 D3
Our only stand-mounted speaker featuring a diamond dome tweeter.

HTM1 D3
A centre speaker for those who demand the very best.

803 D3
The most compact headed model we've produced yet.

804 D3
Remarkable sound, and a more traditional speaker form.

HTM2 D3
The ideal centre speaker partner for the smaller speakers in the range.

DB1
Our most advanced subwoofer, for full-blooded cinema sound.

CM Series
Beautiful sound

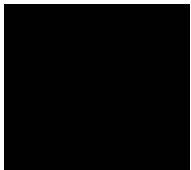

The CM Series is an elegant, high-performance range for the home. Combining advanced engineering with fine craftsmanship, the series uses audiophile features found in our studio speakers, including tweeter-on-top design. So it's easy on the eye, and music to your ears.

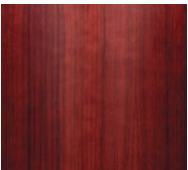

CM Series

Gloss Black

Satin White

Rosenut

CM10 S2
The range's flagship floorstander, featuring studio-grade tweeter-on-top technology.

CM9 S2
Three-way floorstander capable of near studio levels of performance.

CM8 S2
High performance speaker, and the most room-friendly floorstander in the range.

CM Centre 2 S2
Three-way centre speaker for crystal clear movie dialogue and detail.

CM Centre S2
The ideal centre speaker partner for the smaller speakers in the range.

CM6 S2
The CM Series' top-performing stand-mounted speaker, with a tweeter-on-top design.

CM5 S2
A traditionally-sized stand-mounted speaker, with a decoupled double dome tweeter.

CM1 S2
The range's most compact speaker.

ASW10CM S2
Powerful subwoofer available in a range of finishes to complement the series.

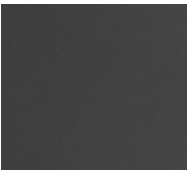

600 Series
Hi-Fi for all

The latest 600 Series makes audiophile sound and leading-edge speaker technologies more accessible than ever. As well as borrowing more features from our flagship ranges, the series brings a clean, modern look, a choice of finishes and a leap forward in sound quality.

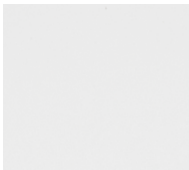

600 Series

Black Ash

White

683 S2
Ideal for audiophile stereo and home theatre applications in larger rooms.

684 S2
Room-filling sound without a room-filling speaker cabinet.

685 S2
At home on a stand, wall or bookshelf, and featuring a decoupled double dome tweeter.

ASW610XP
A powerful subwoofer designed for larger home theatre environments.

ASW610
Outstanding subwoofer performance in medium sized rooms.

686 S2
The most compact 600 Series speaker also comes with a decoupled double dome tweeter.

HTM61 S2
The perfect partner for larger 600 Series speakers in a commanding home theatre system.

HTM62 S2
Designed for outstanding performance in small to medium sized rooms.

ASW608
The most compact of the 600 Series subwoofers, for big sound in small spaces.

DS3
A wall-mounted speaker giving more control over the surround sound experience.

Cinema systems

Bring all the excitement of cinema sound into your home with our range of home theatre speakers. Whether you want to create a dedicated cinema in your home, or you're simply looking for a more immersive sound from your TV, our speakers will lift you out of your seat and propel you into the heart of the action.

Custom Theatre
The authentic cinema experience

Dedicated home cinema sound doesn't get any better than Custom Theatre. Designed to be custom-fitted into walls or behind cabinetry, these speakers deliver stunningly immersive movie sound with studio-quality levels of realism. It's the true sound of cinema in your own home.

Moving sound
With Custom Theatre, sound moves precisely in any direction, just like Dolby Atmos™. The result is a three-dimensional soundstage that perfectly reflects the action on screen.

Mini Theatre
Bring Hollywood home

Experience the thrill of true cinema sound in your living room with Mini Theatre. On a shelf or their own stands, these cinema speakers blend unobtrusively into your surroundings, while creating an immersive soundscape that feels thrillingly natural and true to life.

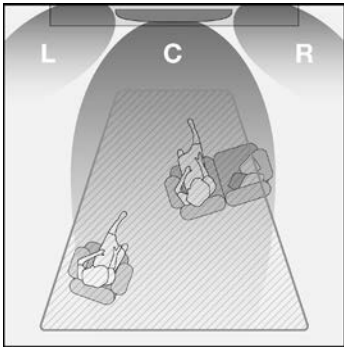

Panorama 2

Widescreen for your ears

If you crave the immersive experience of cinema sound but don't want to fill your room with speakers, Panorama 2 is the answer. The soundbar mimics the effect of a multi-speaker surround system, bringing movies and games to life through one discreet speaker.

Walls of sound

Panorama 2 uses the walls of your room to guide sound around your viewing area. Angled drive units direct sound channels towards wall surfaces, which then reflect back to the listener, creating a convincing surround sound effect.

Custom installation

Does your listening environment pose a problem for conventional speakers? Our custom installation ranges will rise to the challenge. From systems designed to disappear from view within walls and ceilings, to rugged monitors for outdoor and high traffic areas, these speakers bring great sound to places others can't reach.

Custom Installation
See nothing. Hear everything

Hide the hardware, reveal the true quality of your music. Our Custom Installation speakers are made to vanish into walls and ceilings, fitting virtually flush to the surface with minimal visual impact. Combining robust construction with advanced acoustic engineering, they deliver a sound that's quite simply out of sight.

From Hi-Fi to Hollywood
Our Custom Installation range can be used in any home audio set-up, from two-channel Hi-Fi to multi-room sound systems and home cinema.

AM-1
Listen anywhere

If you want to bring impeccable sound to places conventional speakers fear to tread, we've come up with the ideal solution: the AM-1 architectural monitor. This weatherproof speaker is designed with the outdoors in mind – it's perfect for gardens, pool-sides and patios – but it's also a great choice for public indoor spaces like bars or restaurants.

**Great sound,
whatever the weather**
The rugged, seamless design of the cabinet reduces resonance and aids sound dispersion, while protecting the speaker from the elements.

Marine speakers
Music on board

No matter where your sea-going adventures take you, great sound can travel with you. Designed for use both on and below deck, our custom-fitted marine speakers are built to withstand exposure to sun, wind, salt water and everything else the ocean environment can throw at them. So you can enjoy an outstanding musical experience wherever you set sail, from the tropics to the Arctic Circle.

Wireless music systems

Think of a track. Now imagine you can just play it – instantly, in room-filling, Hi-Fi sound quality. With our wireless speakers, it's easy. Stream via your phone, tablet or laptop, using all your favourite music apps. Bring music wherever you want, from living rooms to bedrooms or even your garden. It's Hi-Fi for the way we live today.

Zeppelin Wireless

Performance, amplified

Designed as an all-in-one Hi-Fi system for the home, Zeppelin™ Wireless is recognised as the best in its class for wireless audio performance. That's down to a combination of new drive unit technologies, refined digital signal processing and rock-solid cabinet construction. Add in great connectivity, and you've got a system that's as intuitive to use as it's pleasurable to listen to.

Wide-angle sound

There's a sound acoustic principle behind Zeppelin Wireless' elongated shape. Placing the drive units as far apart as possible creates a wider soundstage, and a more natural, spacious sound.

Choose your finish

Zeppelin Wireless is available in two colours: black and white.

T7 Wireless
Take music with you

Perfect for smaller rooms, barbeques or trips to the park, T7 is the most portable wireless speaker we've ever produced. But don't let the size fool you. Thanks to technologies like our Micro Matrix™ bracing system and two high-output bass radiators, plus an incredible 18-hour battery life, T7 Wireless delivers a remarkable sonic performance. Anytime, anywhere.

Choose your finish
T7 Wireless offer a choice of two stylish colours: black and gold.

Headphones

Get closer to the true sound of your music on the move. Using advanced technologies and fine quality materials, and tuned by the same engineers responsible for our flagship 800 Series Diamond, our headphones bring you the remarkably natural, lifelike sound of real Hi-Fi, wherever you are.

P7 Wireless

True sound untethered

With P7 Wireless, you can forget about wires, and just feel the music. Drawing on everything we know about speaker technology, and featuring new drive units inspired by our stand-alone Hi-Fi speakers, these over-ear headphones deliver stunning acoustic realism, with all the freedom and convenience of wireless.

- Crystal clear immersive sound wirelessly
- 17 hour battery life
- Comfortable memory foam pads
- Stylish design
- Easy setup/pairing

Ivan Smagghe
DJ, producer and record label owner

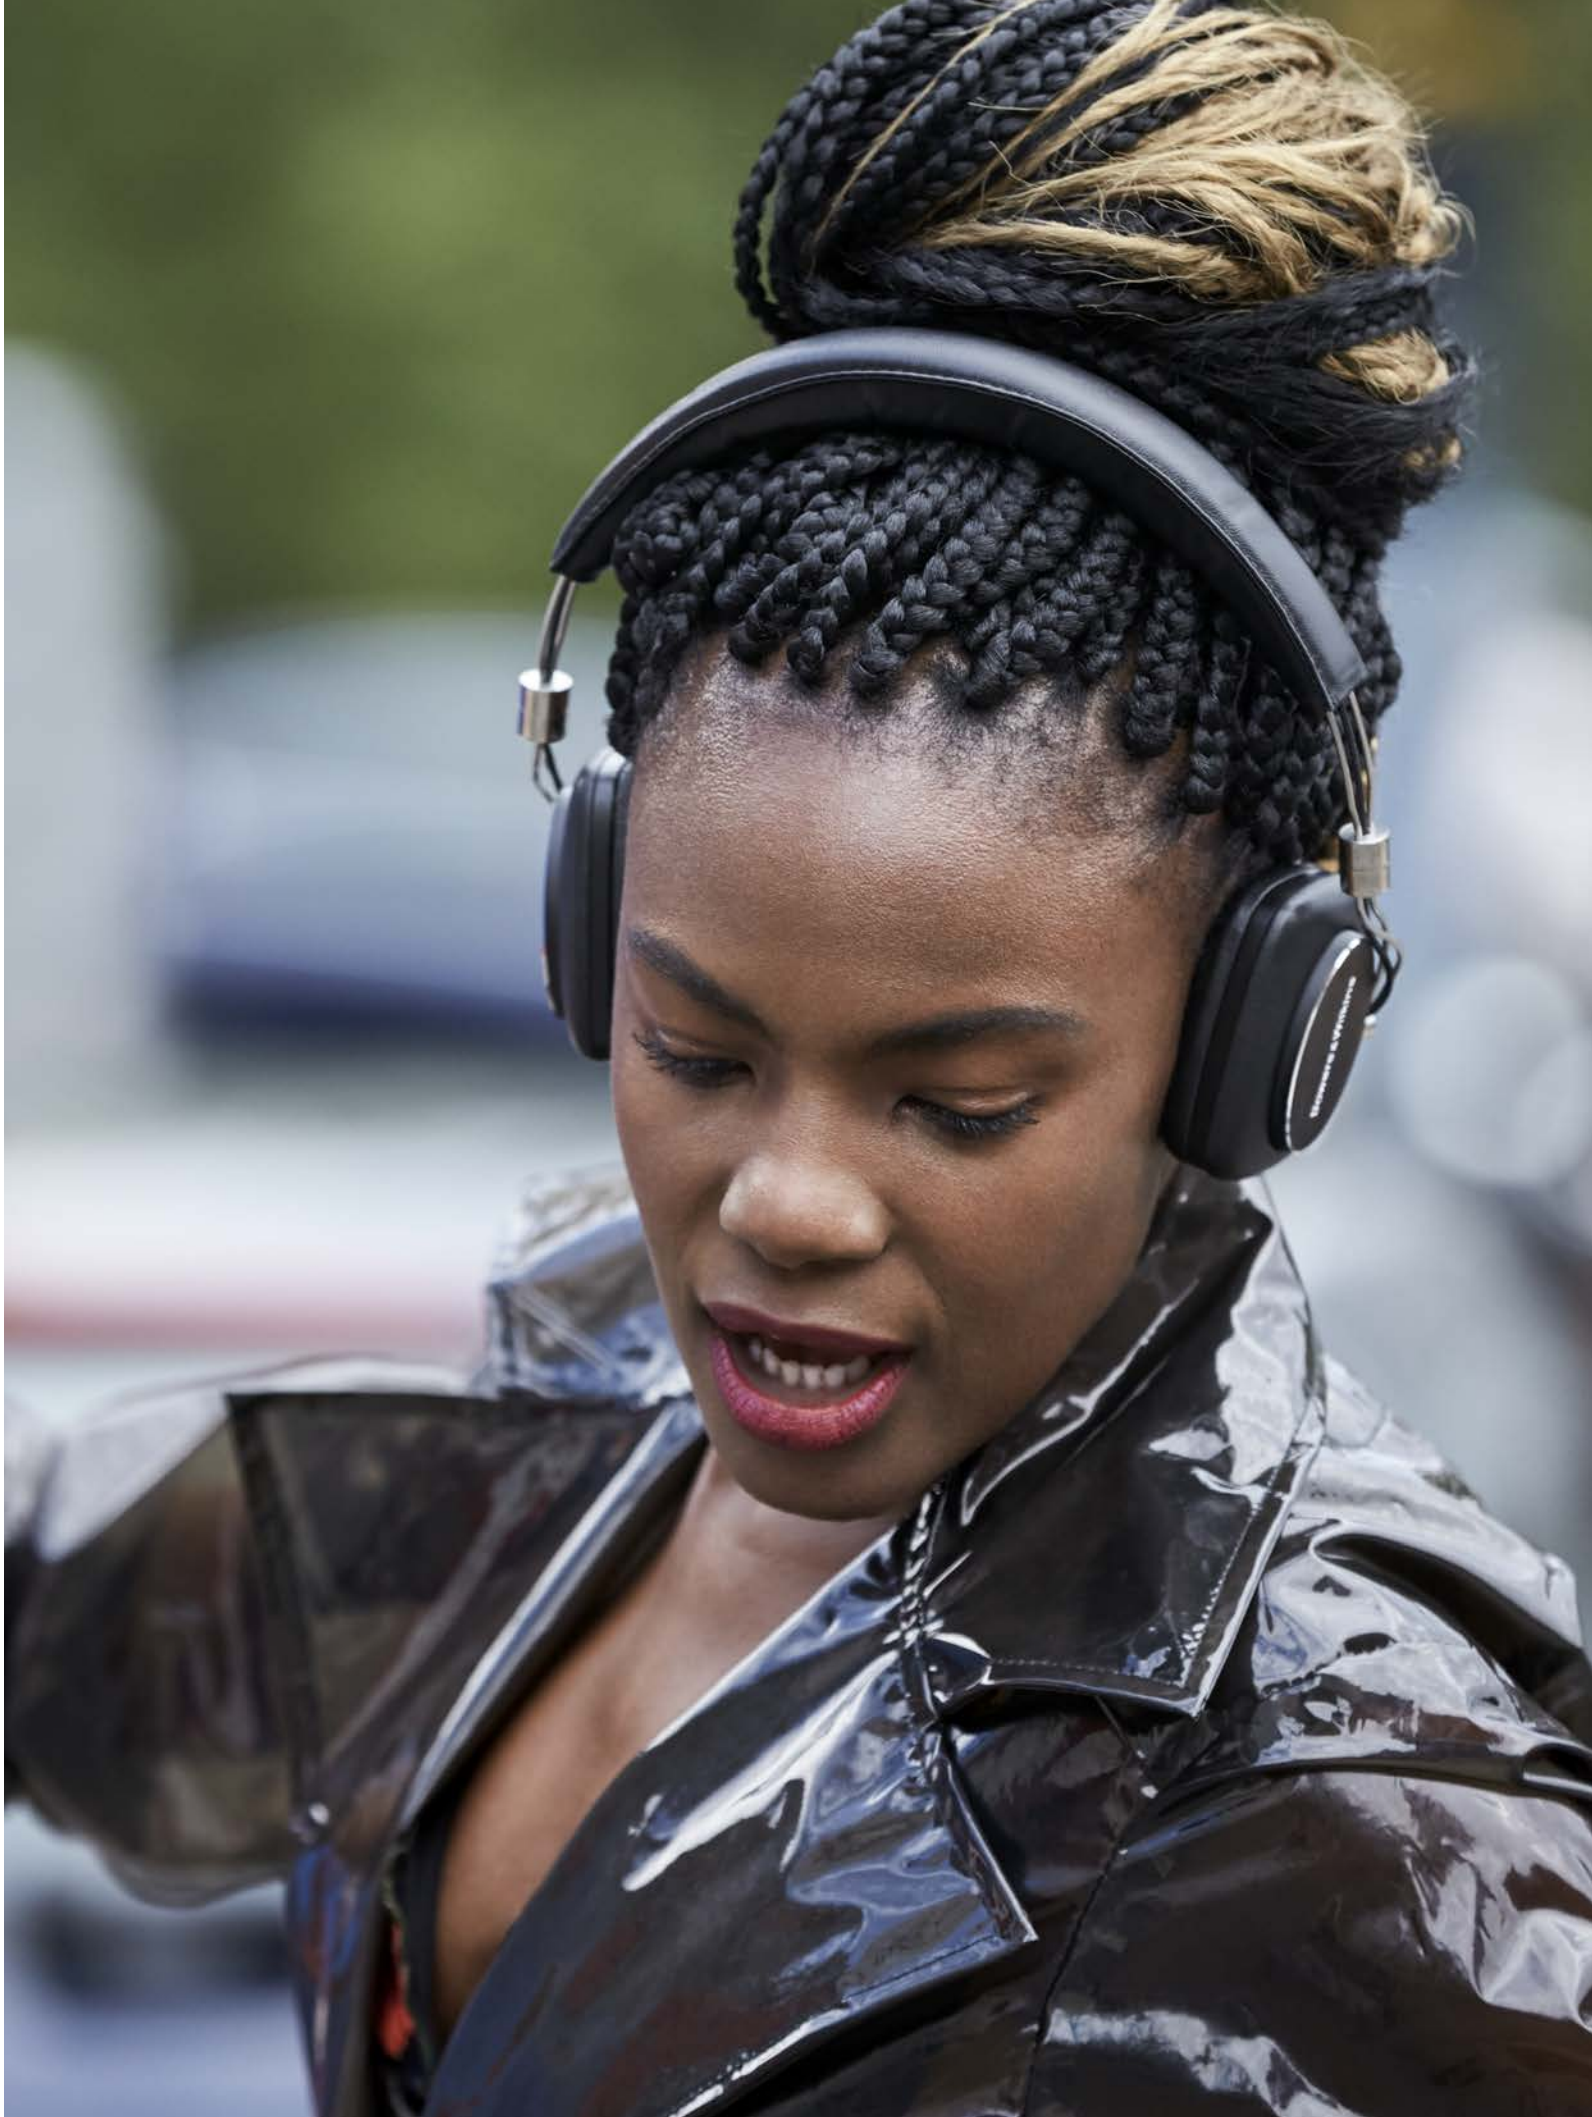

P5 Wireless
Hi-Fi to go

Get closer to your favourite music wherever you are with P5 Wireless, our noise-isolating on-ear wireless headphones. P5 Wireless features a radical new drive unit design for remarkably lifelike sound without wires, while high-quality materials ensure a premium feel and a comfortable fit.

- Great sound
- 17 hour battery life
- Comfortable on-ear pads
- Stylish design
- Easy setup/pairing

Shingai Shoniwa
Singer-songwriter, bassist,
and lead vocalist for The Noisettes

P9 Signature
Luxury Redefined

Released to celebrate our 50th anniversary, our new flagship model reveals the depth, detail and emotion in your music that other headphones miss. Developed entirely in-house, P9 Signature’s unique angled drivers create a stunningly convincing soundstage. Exquisite craftsmanship and premium materials such as Italian Saffiano leather ensure a timeless look and luxurious comfort.

- Pristine sound
- Pinnacle of luxury headphones
- Superior comfort with a modern retro design
- Angled drivers provide an incredibly special soundstage

Thurston Moore
Guitarist, songwriter, composer
and founder of Sonic Youth

P3 Series 2

Portability meets performance

P3 Series 2 offers the perfect balance of portability and performance. The latest version of these highly versatile on-ear headphones comes with improved materials, all-new drive unit technologies, and a lightweight, foldable design that fits easily into your life.

- Great sound from a small compact design
- Foldable with a hard protective carry case
- Leather ear pads provide tighter seal to ear, good for comfort and sound quality
- Perfect for travelling/commuting

Hollie Stephenson
Soul and R&B singer-songwriter

C5 Series 2

Hear the quality, forget the headphones

C5 Series 2 in-ear headphones bring you amazingly natural acoustics and fit so snugly in your ears that you'll forget you're wearing them. The latest version is lighter for an even more comfortable fit, and features redesigned drive units for enhanced sound quality.

- Crystal clear audio with remarkable bass extension
- Secure loop to help hold the speakers in your ears
- Comfortable ear buds
- Perfect for high quality audio on the go

P7 and P5 Series 2
Concert for one

The classic wired versions, our P7 and P5 Series 2 headphones deliver the same lifelike acoustic performance and premium feel as their wireless counterparts. The larger P7 model offers an over-ear design for immersive sound, while the lighter P5 Series 2 is an on-ear model designed for noise isolation.

P7

- Independent diaphragm and suspension components
- Crystal clear immersive sound
- Comfortable memory foam pads
- Stylish design

P5 Series 2

- Precise and controlled drive units
- Great sound
- Comfortable on-ear pads
- Stylish design

Car systems

Music and driving were made for each other. The right track, at the right moment, can set the pulse racing just as quickly as the sound of a well-tuned engine or a smoothly executed hairpin bend. So for us, it makes sense to apply our acoustic expertise to sound on the road. The result? The most faithful sound reproduction you'll ever hear behind the wheel.

Car systems

It's one thing to produce great sound in a room. It's a different matter to do the same in a car – a vibrating shell with next to no room for drive units, let alone speaker stands. By adapting our innovations to suit the demands of a car cabin, we've created audio systems tailor-made to work in harmony with a car's internal architecture.

Automotive partners
Bowers & Wilkins has created premium audio systems for some of the world's most prestigious car brands, including BMW, Maserati and Volvo.

50 years – 50 albums

What are the best-sounding records of all time? It's a good question. So, to celebrate our 50th year, we've come up with a list of 50 albums that deserve to be hailed as sonic pioneers, chosen by our staff, our friends in the recording industry and our customers. Did we get it right? See our top 50 online and decide for yourself.
